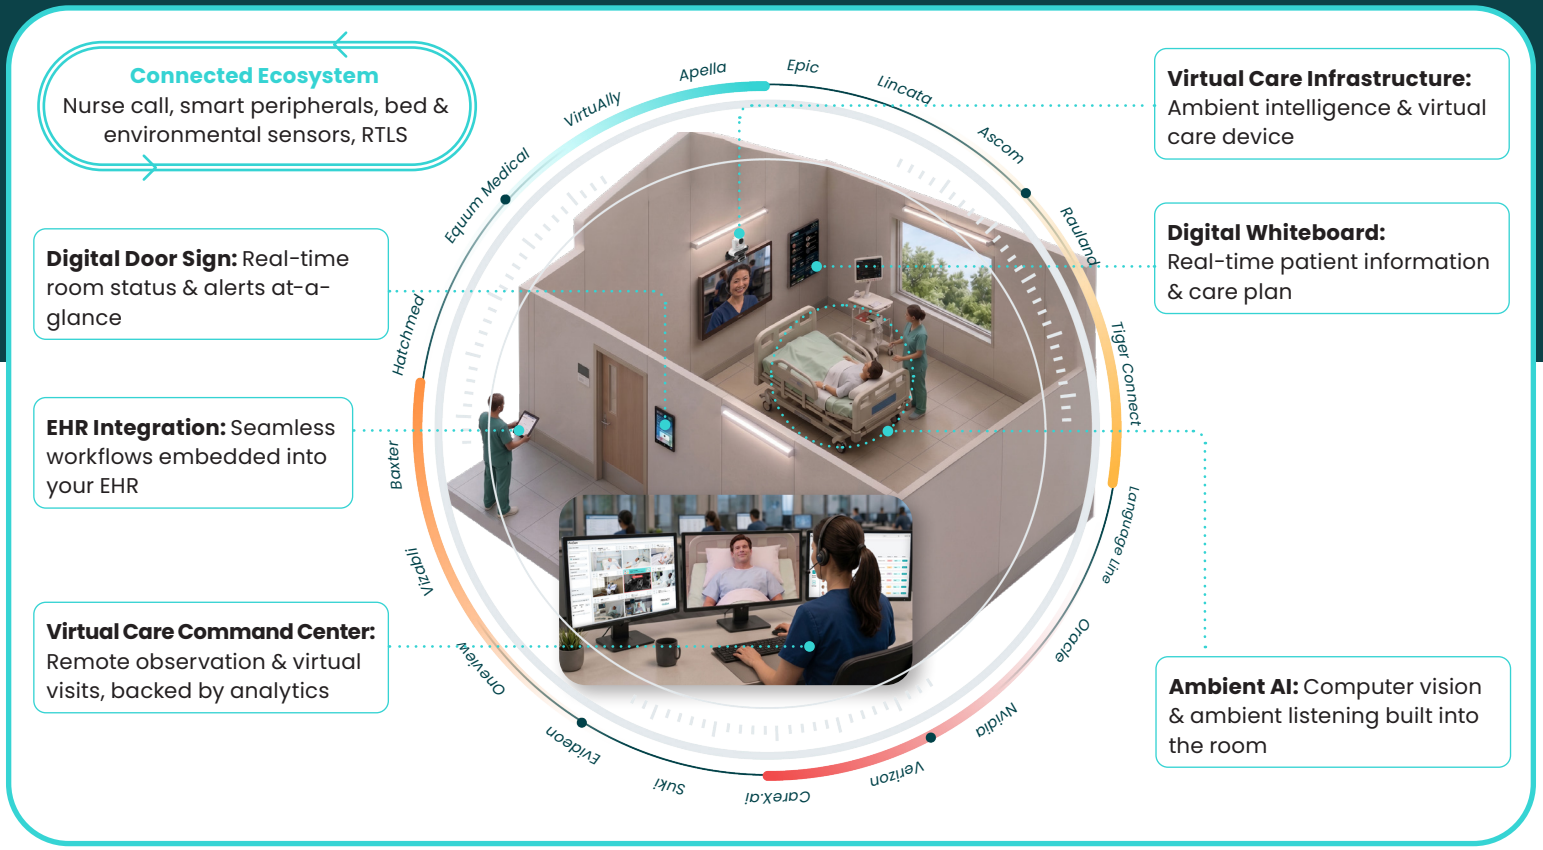
AvaSure

Innovating for a New Era of Care

AvaSure® is the leading virtual care platform that powers the smart room — connecting care teams, EHR-based clinical workflows, and AI applications to extend the reach of caregivers, advance patient safety, and deliver measurable outcomes across every care setting.



Why health systems choose AvaSure

Clinical wisdom built into every rollout
15% of AvaSure staff are nurses, bringing clinical expertise to programs before, during, and after go-live—with dedicated, U.S.-based support available 24/7.

Built to work with Epic
Embed virtual care into the Epic workflows clinicians already use. AvaSure is Epic Toolbox designated for Inpatient Virtual Care, helping health systems maximize their EHR investment while simplifying the caregiver experience.

The eyes and ears for your smart room
One platform with an open architecture connects the EHR, devices, and AI partners—so you can add new capabilities without adding another disconnected point solution.

ROI you can prove, outcomes you can scale
AvaSure backs every program with 150+ case studies demonstrating ROI and clinical outcomes, and delivers 6x ROI.

1,200+
hospital customers

5,000+
deployments

15+ years
of clinical expertise

One platform. More ways to transform care.

AvaSure brings together the technology, intelligence, applications, and integrations health systems need to power the smart room—all on one connected platform.

VIRTUAL CARE DELIVERY

Virtual Care Hub · Continuous Observation · Episodic®

Manage virtual care operations, extend caregivers across more patients, and support virtual visits, patient observation, virtual nursing, specialist consults, and other virtual care workflows.

AI & AMBIENT INTELLIGENCE

Computer Vision · Ambient Listening · Contactless Vitals · AvaSure Virtual Care Assistant™

AI models continuously interpret activity in the patient room to support fall and elopement prevention, pressure injury prevention, vital signs monitoring, patient mobility, staff rounding, PPE compliance, and room turnover, while a virtual care assistant triages patient requests and prioritizes them for caregiver follow-up.

SMART ROOM EXPERIENCES

Digital Whiteboards · Digital Door Signage

Bring timely patient, care team, and room information into the physical care environment, helping keep patients informed and giving caregivers important context at the point of care.

CONNECTED INFRASTRUCTURE

Clinical-Grade Devices · Epic Integration · Open Ecosystem

Epic TOOLBOX 2026

Connect the room through clinical-grade video, audio, and sensing infrastructure while bringing virtual care and smart room experiences into the EHR workflows clinicians already use. An open ecosystem extends the platform across nurse call, clinical communication, interpreters, patient engagement, AI, and other hospital technologies.

INSIGHTS + OUTCOMES

AvaSure Analytics™

Turn data across virtual care, AI, and smart room workflows into actionable insights, benchmarks, and ROI—helping health systems understand utilization, performance, safety, workforce impact, and operational outcomes.
